

Preloaded Punctal Plugs

FCI EXCLUSIVE

Description :

FCI's Preloaded Punctal Plugs are "ready-set" plugs used for punctal occlusion. The Preloaded plugs conform to the natural anatomy of the eyelid with ultra-thin, medical-grade silicone collarettes for maximum patient comfort. For ease of use, these preloaded punctal plugs are pre-loaded on a disposable inserter/dilator device and are easily removed with forceps.
